

After a long and grueling winter, your facility could use a little T.L.C. - tender loving cleaning.

Since hundreds of people have been occupying or visiting your business over the past few months, chances are germs, odors, and dust has built up on surfaces and equipment.

With spring officially here, now is the perfect time to deep clean your facility to freshen it up for a new season of customers. Use this room-by-room spring cleaning checklist to make sure every area gets the proper cleaning attention it deserves, and no surface is left behind.
